### PROFILE

Software Developer with over a year of experience building and maintaining School ERP systems using CodeIgniter (PHP). I have hands-on experience developing admin panels, managing MySQL databases, and integrating third-party services like Payment Gateways. While my core experience is in PHP, I am actively building projects with Node.js and Express.js to expand my backend skills. Familiar with version control (Git) and basic CI/CD workflows.

### WORK EXPERIENCE

● <b>MICA Educational Company Pvt. Ltd.</b>	SEP. 2024 – PRESENT
Software Developer	
• Implementing new features and modules in the School ERP software using CodeIgniter 3	
• Implemented a Geofencing Attendance System for tracking employee location-based presence	
• Providing ongoing technical support and maintenance for the ERP system.	
• Creating dynamic, responsive websites for schools tailored to client needs	
• Integrating secure payment gateways and implementing webhooks for real-time transaction handling and notifications.	
• Collaborated using Agile methodologies with Jira for sprint planning and progress tracking	

### PROJECTS

- **School ERP System**
  - Designed and developed a comprehensive school ERP system
  - Integrated essential modules including admission, fees, enquiry, class, and attendance management.
  - Developed robust RESTful APIs and implemented role-based authentication and authorization features.
- **CI/CD Pipeline for Node.js Deployment**
  - Automated a continuous integration and continuous deployment (CI/CD) pipeline using GitHub Actions.

### CERTIFICATIONS

- Docker, Jenkins – KodeKloud
- OJT Certification in Python
